

NCDTech: FAQ Restore Volume Shadow Copy Client.

Step 1: Browse with Windows Explorer to the directory that used to contain the file and right click on that directory.

Step 2: Click "Properties".

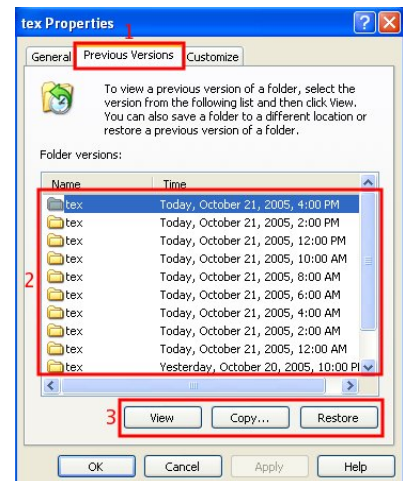

Step 3: Click "Previous Versions".

Step 4: Choose the snapshot from the time and date that should contain your deleted file.

Step 5: Click "View".

Note: You can also choose "Copy" or "Restore" if you want to copy or restore the whole directory.

Note: A window will appear showing the contents of the directory at the time of the snapshot.
